Smithsonian Institution

Washington City Dec. 18. 1850.

Dear Sir.

As superintendant of the Natural History department of the Institution, I have been requested by Prof. Henry to answer your communication of Sept. 2. 1850. He also requests me to apologize for the delay in attending to the contents of your letter, as he was absent when it arrived, and becoming engaged, he has nothing of interest accidentally diverted your despatch.

The collection of Plants you offer, we shall be glad to receive. It is desirable that all such specimens should be labelled put & arranged, as these in this condition, Seeds &c. on by Adams Express, carefully boxed. At the same time, if not already forwarded, you might send the Plants deposited with you some time ago, for Rev. Thos. C. Porter of Alexandria Pa (now of Mercersburg). He will be in this city; in the spring and will receive them.

The meteorological records you offer, will be very acceptable. To facilitate your labors in this respect, blanks will be regularly forwarded

to you. I send copies of some meteorological publications which you may not yet have received. With regard to the continuous observations for the last 12–16 years, these will probably come into excellent account, some time hence. In the meanwhile, the abstract in Dr. Drake's book will answer our immediate purpose.

The Smithsonian Contributions are not now in the market on sale, but it is proposed to set aside a part of the edition of the 1st Vol. for the purpose. The second Vol. is in press, to be issued before long. The price of these Vols. has not yet been fixed upon; probably about 5.00 each. But of all these items I will advise you hereafter. Of the astronomical and other scientific memoirs, which may from time to time be published, you shall receive copies from the Institution of those in which you may be specially interested, as a slight token of the respect it bears towards one who has rendered such invaluable aid to American explorers and investigators, as yourself.

We are now beginning to make collections of American Natural History, and will be much obliged to you for any assistance which you may be able to render. The objects I wish specially

are skins, skulls, and skeletons of North American Mammals, as of Buffalo, Wolves, Bear, Beaver, Badger, Wolverene &c. Horns of Black tail deer, Elk &c. Still more desirable are the fossil remains from the Upper Missouri, as from the Mauvaises Terres of White River, of Milk River &c. I understand that Dr. H. C. Prout has such specimens as also Mr. McKenzie. Could not these gentlemen be induced to part with them, at least for a time. Dr. Leidy is now engaged in preparing an elaborate memoir on some bought to us last summer by Mr. Culbertson, and it is desirable to have as many specimens as possible for the greater completeness of the monograph. They shall be returned, after describing and figuring, if desired.

I am also engaged in collecting fishes and reptiles, for the Institution, and have a very large collection. Of the Missouri species however, I have nothing. I would desire specimens of all the fish of the Missouri river, and the small streams in the vicinity of St. Louis; for the smallest to the largest — minnows, and tritons". Also any reptile. Is there a large Salamander, found

10 or 12 inches long found now about St. Louis? If so, I would much like to have specimens, as of any and all the species of Salamander. Menobranchus & Menopoma too.

We shall at all times be happy to serve you, in any way that lies in our power. Should you wish to send or receive books, specimens &c to or from any individuals or Societies, at home or abroad, we can readily further your wishes from the constant intercourse we keep up with such persons or institutions. We have a regular system of communication with all parts of the continent of Europe, by means of regular agents, in Paris, Leipzig, and London. And we shall at any time be happy to hear from you in regard to any Scientific or other movements or suggestions.

Yours respectfully

Dr. Jos. Engelmann
St. Louis Mo.

Spencer F. Baird
Asst. Secretary S. I.

P.S. Please send a regular bill and receipt for the collection of Fendler's plants.

My Dear Doctor

Your letter of July 23, arrived at Washington after I left, and was forwarded to me at this place. I am here on one stage of journeying to Albany, which I hope to reach by the time of the Meeting.

I was not aware of Wizlicenus having gone to California. Is this so? I supposed him to have visited the relations of Mrs. W. in the North.

Dr. Le Conte has returned to Newyork with vast collections. Many reptiles among them.

Your Mss. notes for collectors will be highly valuable for our "Manual of Directions". Do send it on to Washington by Oct. 1st when I expect to be back at W. Dont forget this, as I anticipate getting many valuable hints.

Sincerely yours
S. B. Buckley

I wrote two days ago acknow-
ledging your letter of July 23; and respon-
ding to the various queries and notes
therein contained. Since then I have met
a young gentleman from St. Louis, now
here. named Henry Reed, who told me
that Capt. Van Vliet had deposited
with you for transmission to me, some fossils
&c. Will you please exercise great care
to pack the fossils tightly in a stout box.
and send by Adams express to Washington. Those sent
by Dr. Prout last Spring were much injur-
ed by careless packing.. If there are bulky
horns, and such things, please have them
well packed also. Make a bargain with
the Express men before you send, and have
the things forwarded by the cheapest
route, even though it be the slowest.
Perhaps the route from Cincinnati by

the Lakes may be cheaper
than by Pittsburg, in the present
stage of low water. Be sure to write
to me at Washington stating the
rate of freight agreed upon, and enclosing
receipt of Adams & Co.

Yours Sincerely
J. J. Audubon.

Dr. Geo. Engelmann
St. Louis

I hope Capt. Van Vliet has sent
all matter of this kind, in his pos-
session. We want all the fossil
remains, Elk & deer horns & skulls,
with there & all other animals,
skins &c.

Rec'd March 9th — Smithsonian Institute
Ans April 22 — Washington Feb.

My dear Dr.

May I continue to tax your patience and time by the impusition(!) of additional commissions all however tending towards the advancement of our common cause — Natural History —?

I am now directing special attention to the collecting the North American mammalia, skins skulls, & skeletons, and have just written to several gentlemen of the American Fur Co. on the Upper Mo, as well as to Chouteau &c. I wish much that you would write as little delay as possible, call upon such gentlemen of the Co. as may be most suitable, and endeavor to enlist them in the cause. I would especially wish permission to send to the different parts, arsenic for preservation, as well as alcohol. By adding Tartar emetic, Specacuanha, quassia or other bitter or nauseating substance, there would be no temptation to the abuse of this liquor. There might perhaps be a necessity for permission from the Indian agent for so doing, which would no doubt be granted with a knowledge of the circumstances.

If these objects can be accomplished, please procure the quantities of the respective articles hereafter specified and send through the Co; forwarding the bill to me for payment. The arsenic should be put up in 10 lb. canisters, and the alcohol in 5 gallon kegs or cans. Of course we want the expenses to be as moderate as possible.

Will it be possible to approach any of the other Companies in St. Louis? I have never had

Dr. Jorge Engelmann
St. Louis

cm
copyright reserved
MISSOURI BOTANICAL GARDEN

communicate with any but Chouteaus and Co, but would be glad to extend the circle. If it will be of any avail, and you will give me the necessary information, I will write directly to such.

May I send to your care for distribution a box containing books for various institutions in Missouri and neighboring States? It will be prepaid, and the donees will be directed to send for them. I will take the occasion to send a copy of Harveys American Marine Algae, just published by us, with some documents, and anything else that you may desire. Let me know about this as soon as possible, and whether I may continue to do the same.

Is there any possebility of getting in St. Louis, from individuals or companys, by gift or purchase, skins of mammalia? They would be better with the skulls, but even hunters skins will do, if they have all the skin, ears, muzzle, tail and paws. — dressed or undressed. Please make some enquiry and let me know, as to species, qualities, and prices. Enquire particularly for foxes of any kind from the Mountains, plains, and Upper Missouri; Badger, Black tail deer &c. Bear, prairie dog. &c.

I suppose it is about time to begin that collection of fishes from St. Louis; dont forget it. I want very much besides these animals and reptiles, specimens of the smaller mammalia, gophers, mice, rats, squirrels, bats &c. of all kinds even the commonest.

Anything from Lindheimer? I send him 3.00 some months ago, for purchase of materials.

Very truly and sincerely Yours

Spencer F Baird

Dr. F. Engelmann.

Deer Doctor:

Yours letter just received, am
I am delighted to learn of your
operations in our behalf, both in re-
gard to yourself, and the Fur. Co. In
regard to the vessels for alcohol. Kegs
ale generally best, as they can be used
easily closed for transportation. Care
to hold the specimens in, and are
must be taken that they be tight
however. All such things should
be sent to you, and put in proper
order to be sent here. Coming back
to St. Louis by steamboat, as they would not
usually. It will make little difference.
Use your own excellent judgement about
that matter. Will any of the keg
come back this season. Impress Mr.
Sappy with the importance of urgent-
ting specimens of every thing in the
Zoological line. Fishes, reptiles, mam-
mals, &. especially fossil remains.
It will hardly be worth while to send
Strychnine, as it costs much, and is
besides, only available for wolves
Foxes, which can be had otherwise.

I hope you wont forget the
small fry of your country. I want
minnows & but I also want min-
nows, chubs, suckers, shiners,
the commonest things are most

wanted. A net used for catching bait will do well for my pets: Any Salamanders will be very acceptable, as there are several species about St. Louis I have not yet got: also frogs.

A dispence or two judiciously bestowed on boys will get them service in such matters: we will of course foot the bill.

Yr many thanks yrmly for the slight share bearing has in the circular. I waited for yr promised communication till the last moment, and then was obliged to do without. Let me have your full directions, as also for Cactæ, and I will go in the boy report, under way. Much obliged for any hints in regard to circulars of Periodical Phenomena, or anything else. I have sent two of the latter to California: but many of the Dracæna. I must forget you about the documents. will send copy of Darwin's Algae, just published.

Truly yrs

My dear Dr.

I have just received your letter, forwarded me from Washington. As there is no particular hurry about getting Dr. Hammonds specimen (running alcoholic) please take your time for it. If there are skins, however I would like especial care paid to them. Would it be possible for you to have them baked, before re-packing? After this they had better be put up with an abundance of camphor & tobacco leaves, which I can be had for a few cents (5 to 12) per lb.

If the boxes are heavy, send to care J. D. Leech and Co, Pittsburg. If not more than 150 or 200 lbs. then they might go by Adams Ex. slow Line Express. ~~Note~~

I am delighted to hear of your doings with the casks of alcohol, and the arsenic

My Dear Sr.

I have in obedience to your kind permission sent off two boxes & books, containing panels for the S. I. to various Institutions as per enclosed invoice. You will find one for yourself containing miscellaneous publications. I did not send pub. does. as I do not know what you have. Check off your desiderata on the enclosed list and I will do my best to supply you. would you like several Wisconsins?

The bundles contained in the box go by Adams Ex Express. prepaid. It may be well to arrange with some bookseller in St. Louis to receive the boxes from Ash. and distribute for you, thus saving the trouble. Let me know when the boxes arrive, and what bookseller you have persuaded to take the panels. Each party has been notified to apply for his panel. to be sent him at his own expense; we paying only to St. Louis.

I have heard nothing from you in regard to Dr. Hammonds boxes and begin to be uneasy.

MISSOURI BOTANICAL GARDEN

My Dear Dr.

After writing my last
pleasing letter last night, I
had the great pleasure this
morning of receiving yours of the
24th ult. answering all the par-
ticular points in question. I was much
interested in what you say of Prince
Paul of Wurtemberg. Do tell me
whether he has collected Reptiles &
fishes to any extent. If so it will
be necessary for me to go immediately
to work and describe his western spe-
cies. Don't omit to enlighten me
on this point. I would like a mere
minute account of the region he
has visited and the kind of thing
he has collected. Did he get any
fossil vertebrates, and where?
If possible. I would like to have
these things, boxed and hauled here
this month. So as to have them
go in the report for 1882. Can you
accomplish it? Send by Adams
Express, Slow line. I am delighted to
hear of the barrel of specimens. I
hope it will embrace many small fish,
and a good many reptiles. We are now
monographing the opisthoglyphs, and

want very much the Species from your vicinity. Especially the common things, water Snake, Garter Snake, &c. We shall double the Species, principally from the West, but several from East & the Mississippi. The Lepidosteus (Lepisosteus ? Bol.) of Louisiana is different from ours. Cannot you make a raid & Specimens of Serpents: from some of your friends Collectors for us: any shall be returned if desired. We want to do the thing up so that nothing will be left for our Successor. Such Serpents I would be glad to have as soon as possible, I would not put all the Specimens in a large barrel. Better use several small Kegs. If you have enough to fill them. See that they are full. Perhaps you can find some Collector of Reptiles or other things from the plains Nebraska, California &c. to send: Fed Dr. Hayden Collector any thing: Any skins of birds & mammals will be acceptable. Perhaps you had better send off immediately what you have got, rather than wait to collect more, and let the rest come again. I am very anxious to get hold of what is in hand. But dont forget the Snakes: I trust you have arrived by this time. What can I send you like a copy of Schoolcraft: Indian work? If so dont you would. Would you immediately

Rec'd March 26th Smithsonian Institution
Ans'd same day Washington March 12 '1883.

My dear Sir-

I do not know whether I answered your letter of Feb. 26th or not, as I write this away from my office & have to keep the record of operations. So here goes again, even if it be vain repetition.

I was delighted to learn that you had packed up the bones. and shall welcome them heartily when they arrive. Perhaps if the box is all ready it would be well to send it without waiting for the other things. I am very anxious to get some of my friends now wanting specimens to work, cleaning them. The other things I am not in so great hurry for. As to the spatulas, how would it do to put a piece of stove pipe and send them in it: or else a tin tube. If well preserved now, they can be packed in moist tow or cotton without actual immersion.

Many thanks for your account of Prince Paul's measurements. Does he visit this country once before, & enter to the visit of Mass. Wed?

I see a new work on Cactaceae announced by Bailleres, giving all the genera and list of species. If it is by a French author, I like I think and costs 2. D.

I do not know anything about the young man of Prof. Hall. He wrote

My Dear Doctor

I have the pleasure of announcing the arrival of the two boxes and barrel, yesterday. I have not yet had time to unpack them, but shall do so soon & make a draft for the bill & invoice and a new blank which please sign & return. The other bill I will pay in a day or two.

I hope you have everything ready for the Steamer & the 15th for Governor Stevens party. I send a new memorandum & the same for fear the letter may have miscarried. These stores Governor S. will want at Ft. Union when he gets across from St. Paul.

In addition to these, stores they will want about 20 gallons of alcohol, to take up with them to St. Paul.

Dear Sir

I have just sent to your address a large box of Mo. S.C. Mo. V for your circle of distributors. It may reach you in a few weeks. It goes by Rail Road to Wheeling. Not being able to prepay here. I want you to send me word of the expenses incurred

Half of the box is occupied by five or six large packages addressed to yourself. These contain a great variety of mosses. Put yourself a complete set, and dispose of the duplicates as will best promote the interests of Science. I send among others a copy of owens Report.

Very sincerely Yours
J. P. Bars

Deer Dr

I was delighted on re-
turning from Wisconsin yes-
terday to receive your long let-
ter. I think you will make
a good correspondent after all
I will write immediately to have
the vol. 7 Laboulbeni sent you
Keep it as long as you please.
On my return to Washington
I will send all the Cecla-
ceae & the Berkeleyan Collec-
tions, as well as whatever hap-
pens in a line of Mss. of his
now en route.

I find here over 100 letters
awaiting my attention and cannot
now stop to answer your letter
immediately. I am much obliged
to you for the criticisms & the
ethography, and shall profit
by them: for many however I
am not responsible. Borrowing from
the original author: Rhaptus
Turnera. Agkistroden. E. Salvadori

My Dear Doctor

A letter just received from the secretary of Missouri states that they have not received the 3rd-4 volumes of Smithsonian Contributions. These were send with the rest in Oct. 1882. If in your hand please send to them by any established mode of transmission.

I think you had better not press the matter of having your plates of Museum Boundary Centennial engraved on Stone in St. Louis. We hope to have Built thereby to get the work done on copper or Steel. especially as the edition called for will be very large - probably 10 or 20 000 copies. many men there can be printed from Stone. We have here some first rate Botanical engravers, the same engaged on the plates of the exploring expedition under Drayton Gunderson and Dr Gray: they have attained to an exquisite degree of excellence in the art. All the other plates as also the animals, insects

been & are being drawn on zinc in the ~~heigth~~ height of excellence and will I hope be equally well engraved, and it would not do to have so important a subject as the Cactaceae less well done. You had better therefore have the drawings made on paper, and send him, and you can have as many proofs for correction as you desire. Another difficulty in the way of stone work is that the contract for printing will probably be given to some one person in Newyork: and your stones once they are used, will have to undergo all the risk of transportation to the east.

If more convenient, or equally so, or ~~equally~~ cheap to have drawings made directly on stone, there will be no objection to it as the impression would be as drawings or engraved for new engravings, but there is not the slightest likelihood of these stones being used in printing plates for the final edition.

Why do you come on with the collections for us? P.S. Agassiz. Have you sent them or yet. I sent papers to Sumner Asa Gray. Send papers to Sumner Asa Gray. Have you got a thing. In a few days I will send you some copies of our new "Erectum" the old edition being exhausted

Alcohol not good for Embryos,

My Dear Doctor

In studying out the small quadrupeds sent by you from time to time in Alcohol. I found two lerking like young white footed or deer mice. They belong to Eumops. but which prove to belong to the genus Reithrodon - and distinguished from Mus by having a furrow down the upper incisors. I wish you would try to get more of these and call attention of some of your collectors to them. The genus is hardly known in S. America.

I am much interested now in small quadrupeds and would be glad to get any number & mail them, Yours &c
Mapp!

April. 24' 1888

My Dear L.

I found today the missing box with Dr. Byers Caracaras - and send it at once by express. It had been removed by mistake from the rest of L.A. Whipples things and thus escaped notice.

I have unpacked with great interest the collections in the Reg and box - and find them very interesting indeed, but a great deal is much new, but a great deal of instruction. The rattlesnakes are very fine: I hope the report of Mr. Kennys death is not correct. The snakes and Centaurea from St. Louis are highly welcome. The two squirrels likewise; what can I send you for his skull.

I hope your efforts among the smaller mammals

Dear Dr.

The seeds came safe and I have sent them to Smith.

I have already forwarded the letter which I was very glad to give your direction to Schultz

was correct.

There is a difficulty about preserving small grasshoppers & alcohol. But it cannot well be helped. I never tried salt and dont know how it will answer. The best way is to make an abdominal incision in all and in some to remove the intestines. I look forward with many anticipations to your collections.

Rec'd June 7th — Washington
Ans'd June 12 — June 2nd 1855.

My dear Dr.

Correspondence with Lt. Lewis looks up. I thus ought to have come yours of May 29. Four days' letters from Hayden, all of which I have answered. I sent them replies to P. Chouteau Jr. & Co. with your enquiries whether they have come, and whether they will be forwarded. I hope that Lt. Warren may be of use to Hayden, perhaps attaching him to his party.

I had already prepared a list of things for Dr. Hayden, which I pushed on to send him by the boat, though I was not aware I was going up so soon. Perhaps they can go by another opportunity, if too late now. Lt. Warren will I trust take up with him a full outfit of every thing necessary. Perhaps he will be willing to consider the Ohio sent to Hayden as part of his

Dear Doc.

Our letters keep crossing back and forwards at a great rate.. I am glad as stated before that yr Ruffled Hayden. although I wish he could have had some other things. However that dont much matter:. You dont know the most important.

I wrote of having some drawings made of Bigelows Cactus - flowers. I now have three specimens'. Cactus fendleri drawings. Do you want them sent to you. The flower I put in alcohol after figuring, and can send also. It preserves perfectly. with all color

My Dear Doctor.

If you have not sent off the Dayden things pleas dispatch them at once as I are very anxious to have them here in hopes of finding some mammals: I want the alcoholic specimens and small skins sent by express: any minerals and bulky goods had best come by Steamboat to Balt. & Ohio RR. at Wheeling. In sending by either line. take regular receipt and agreement for ft. and forward to me

I shall be much disappointed not to have some small mammals, perhaps Reithrodons specially. Can you skin quadrupeds as well as prepare skulls & skeletons? I need much like a few more of the fox squirrel of St. Louis.. I wish I knew what to send to the collectors to strengthen

Jas. and to any one else
to whom yr think such things
would be appropriate

I hope your acquaintance
in the country around will get
some more mice and meadow
moles: arvicola. Mus and
Soex. No one locality thus far
has yielded so much of interest
as Lynns. Several new species can
unfortunately not be described in
detail for want of more perfect speci-
mens. Cant you get about a
dozen more Gophers in alco-
hol. and send on without
keeping on hand too long. The ad-
ditional squirrels will be all
desirable.

If these Sage Cocks were
alive I shall not easily reconcile
myself to letting Prof. Lichtenstein
have them. If the Prussian Con-
sul does much more of that
sort of work I will get his
exequatur rescinded!

So commending the gophers
and mice, arvicolae, particularly
to your favorable consideration
I remain

Ever yours
S. F. Baird.

Dr. J. Englemann.

Would a few cents a piece bring in the
arvicolae — Shrews. If so offer them,
and more or gophers

have a most enterprising naturalist up there, Robert Kennicott of Illinois, who will winter at Fort Simpson, but will return early in the Spring when we can send him funds. A couple of hundred dollars will ensure his staying longer, and perhaps a season also at Lapter House in the more southern Rocky Mts. Even a less sum would be desirable and acceptable, but would not go so far.

Another question. Would the Acad. Science St. Louis like to purchase a collection of California birds all mounted in good style except a few specimens. It embraces about 280 specimens 170 species and over ~~400~~ specimens, male and female of nearly all. ~~It course~~ It is very complete in the large kinds, cormorants, geese, ducks, Eagles, et. and excludes

No. 1989

My Dear Sir

Dr. Comes writes me that he has written you about forwarding to him some more shot. Please add to this say 10 lb. powder and 20 lb. of arsenic. and send me bill of the whole.

If it is perfectly convenient to allow the account to stand over till my return to St. L in October. I would prefer it. otherwise I will arrange to pay earlier. If you have occasion to write me in August please address me as on the

My Dear Baird

There is not the slightest probability that the Bolander here is here. I have been looking for A. on melica on several other Calif. parts for a long time but in vain I have written Mr Scribner about the matter & he will write to Mr Engelmann & Torrey. Perhaps they have them all & you can generally obtain by reference to Congressional documents. I ought to be a botanist.

Sincerely yours

S. F. Baird

Rec'd June 6th

1870

Smithsonian Institution June 2, 1870.

Dear Sir:

Your letter of May 29, addressed to Prof Henry reached the Institution on the very day that he sailed for Europe: I therefore reply to it (in his stead).

The instructions to our agents abroad in regard to parcels for parties other than the Smithsonian Institution, are, to receive nothing whatever in the way of philosophical apparatus, and while directed to forward the ordinary exchanges between institutions and individuals, to refuse any purchases except by special permission. Of the books sent to you were presents, or exchanges for other works, Dr Flügel should not have hesitated to receive and forward them to you. It is possible that the offering of a money value to them was the reason of his refusing to take them.

The Bison skulls, etc, referred to in your letter, were received two years ago, without any indication of their destination. We presumed they were intended as presents to the Institution

and while regretting our ignorance of the donor we entered them as a portion of the Smithson Collection. We shall, however, take them out of the Cases, immediately, and forward them to the Museum of the University of Berlin - as you request.

We are now engaged in making up our usual Summer's sending and if you can forward your package for Professor Braun, at once it will be in time to go forward. If it is not ready we can send it by the next transmission which will take place in the fall.

I am sure Prof. Henry will be very glad to obtain the record of your observations as I know he valued them highly when you were in the habit of sending them. The Clerk in charge of the Meteorological department will shortly send the blanks to your address.

Dr. George Engelmann,
St. Louis,
Missouri

Yours, very truly,
Spencer F. Baird.
Asst. Secy. in charge

Ans April 11th

SMITHSONIAN INSTITUTION,

WASHINGTON, D. C., April 8 1878

Dear Dr Engelmann.

I am preparing a collection of casts of American reptiles especially tortoises, corresponding with that of the fishes exhibited at the Centennial, & am very desirous of procuring the species found about St. Louis, or in Illinois generally. Agassiz mentions a number from that State which we have not yet obtained. Can you not arrange with some suitable person to secure all the species & send them living to me by express? I will gladly pay the cost of the specimens & of their shipment.

I want principally the soft-shelled species; next the Emydæ & finally all the other varieties. They should be as far as possible, of the largest size procurable, the more brilliantly colored the better.

Could not the Academy of Sciences undertake & get up this collection for this department of the National Museum? We would gladly return the

Compliment — in any practicable manner.

Yours very truly,
Spencer F. Baird

Dear Doctor Engelmann.

I am very sorry that under our present arrangement, we cannot undertake to transmit or receive objects of natural history or archaeology, the enormous expense of our exchanges making it necessary to confine ourselves strictly to the moving of books. This we are, of course, willing to continue to take charge of, under the usual limitations.

Sincerely Yours.
